FENCE Z300

Version: 02/2025

Z300 ALUMINUM FENCE

Our fences are perfect for protecting your home from prying eyes. They can not only be installed independently, but also in combination with one of our canopies.

You can choose from aluminum panels in various RAL colors, wood look or natural wood panels made of Siberian larch.

Aluminum panels are available in two different versions: Tongue and groove panels are always installed without spacing and are therefore 100% opaque. Rhombus panels are always fitted with a gap due to their design. This can be determined individually.

ADVANTAGES AT A GLANCE

- Powder-coated aluminum frame profile
- Can be designed with individual fillings as desired
- Designed for easy installation
- The screw fittings are discreetly concealed by inserting an elegant rail
- The hinges and door handles are made of elegant, high-quality stainless steel
- The access door can be individually integrated
- Integrated lighting

WHY AMTS

Your partner for aluminum products

Innovative products ■ Friendly staff ■ Fast service

In-house production

We are a TÜV-certified manufacturer of patio canopies, summer gardens, flat roof carports and vertical awnings. All materials come from Europe and can therefore be delivered quickly.

Patented systems

Thanks to their unique features, such as the revolutionary double chamber system, our S400 profile systems for patio canopies and summer gardens and our C600+ flat roof carport have even been patented.

Personalized advertising material

We provide you with personalized and individual advertising materials and sales documents such as brochures, flyers, offer folders, price lists and much more for the sale of your products.

Competent consulting

We provide you with a dedicated contact person who will support you in your planning with years of expertise in the field of installation and construction technology. We attach particular importance to the external presentation of YOUR brand.

Quality

We only use high-quality, powder-coated aluminum to manufacture our products.

Simple installation

Our products are particularly easy to install thanks to the modular system and the instructions supplied.

Samples

We provide you with product samples so that you are optimally equipped for the presentation to your customer.

Short delivery time

We offer you very short delivery times, which can also be customized by agreement.

Extensive product portfolio

We offer you a large product portfolio from various areas of installation and construction technology.

Free pick-up

You can pick up the products free of charge from one of our 17 stores in Germany and Austria.

OUR FENCE - YOUR CONFIGURATION

You can configure our Z300 fence entirely according to your preferences! Whether you want a closed overall look with our tongue & groove panels or something more open with our rhombus panels.

There are also no limits to your choice of color. In addition

to our three standard colors white, silver grey and anthracite, you can also choose any RAL color or wood look for your fence.

In addition to the aluminum panels, it is also possible to fill your fence with panels made of Siberian larch.

Filling made of:

- Rhombus panels
- Aluminum panels 50x25
- Tongue & groove panels
- Siberian larch

Maximum dimension single field = 3.00m

Maximum height = 1.80m

- Can be coupled endlessly in width

IN-HOUSE PRODUCTION

AMTS as a TÜV-certified manufacturer

AMTS GmbH is one of Germany's leading companies for the sale, installation and manufacture of roofing of all kinds. The product range includes patio roofs, carports, summer gardens, awnings and other innovations. Our products are manufactured in-house and adapted to the individual needs of our customers. Every product from AMTS is subject to the guidelines and standards of TÜV Süd.

What does TÜV certification mean?

TÜV SÜD is a trusted partner when it comes to solutions for quality, safety and sustainability. TÜV has been creating added value for customers and partners for 150 years - with a comprehensive portfolio of services in the areas of testing and certification. Successful certification therefore means high quality and a high level of confidence in the manufacturer's own products. As a rule, a product must comply with a prescribed standard. Certification of the product and the respective company is voluntary and not required for sale.

The very precise TÜV inspection provides the company with proof of a customer-oriented and structured way of working as well as a high quality standard of the manufactured products. With a TÜV certificate, the consumer can be sure that the work and products of the certified company not only comply with a widespread standard, but also meet the high demands of TÜV Süd. Purchasing a TÜV-certified product is a safe bet.

Products from our in-house production

- Patio canopy
- Summer garden
- Carport
- Flat roof carport
- Awnings

Product development

Thanks to our many years of experience with aluminum, we are convinced that aluminum is the perfect material for outdoor use and have therefore made it our mission to constantly develop new innovative products made from this material. We improve well-known products such as bicycle shelters, garbage can boxes and smoker shelters. Thanks to the outstanding properties of aluminum, AMTS is also developing new innovative products, such as the flat roof carport.
